FROM ZERO

Product Designer & AI UX Designer

I design complex digital products that make difficult things feel simple. I combine UX strategy, product thinking, interaction design and emerging AI capabilities to turn ambiguous problems into useful, intuitive products.

Johannesburg, SA

Case Studies

Products built around real problems.

WEB PLATFORM

Financial Operation System

Designing an AI-powered financial operating system that brings financial intelligence, decision-making and portfolio management into one connected experience.

MOBILE APP

Smarter Waste Systems

A digital product concept focused on connecting customers, services and operational workflows through a clearer digital experience.

WHATSAPP SYSTEM

Automation Conversation

Exploring how conversational interfaces can simplify everyday service interactions through WhatsApp.

WEB PLATFORM

Clarity For Enterprise

Exploring how information, workflows and operational processes can be structured into a clearer and more usable enterprise experience.

What I Design

when strategy, technology and interaction design work together.

Product & UI / UX Design

AI Product & UX Design

Conversational UX & AI Assistants

Web & Digital Experience Design

About Me

What i bring to a Product team

Systems Thinking

Product Thinking

AI Fluency

Visual Craft

A designer focused on where product design is going next.

I'm Sphamandla Xaba, a South African Product Designer and AI UX Designer interested in the intersection of product design, complex systems and emerging technology. My work spans AI products, enterprise systems, operational platforms, websites and digital experiences.
